

Passo 1: Ingestão dos dados

The screenshot shows the Databricks interface under the 'Jobs & Pipelines' tab. A red box highlights the 'Create new' section, specifically the 'Ingestion pipeline' option, which is described as 'Ingest data from apps, databases and files'.

Passo 2: Upload dos do arquivo .CSV

The screenshot shows the 'Add data' interface in Databricks. A red box highlights the 'Files' section, which contains two options: 'Create or modify table' (described as 'Upload tabular data files to create a new table or replace an existing one') and 'Upload files to a volume' (described as 'Add files in any format to a non-tabular dataset managed in Unity Catalog').

Passo 3: Criação da Tabela da Camada Bronze

The screenshot shows the Catalog Explorer interface in Databricks. A red box highlights the 'bronze' table under the 'mvp' catalog. The table is named 'mental_health_lifestyle_dataset'. The 'Sample Data' tab is selected, showing a preview of the data with four rows:

#	Country	Age	Gender	Exercise Level	Diet Type	Sleep Hours	Stress
1	Brazil	48	Male	Low	Vegetarian	6.3	Low
2	Australia	31	Male	Moderate	Vegan	4.9	Low
3	Japan	37	Female	Low	Vegetarian	7.2	High
4	Brazil	35	Male	Low	Vegan	7.2	Low
